

## Verzeichnis der für diese Arbeit relevanten, eigenen Veröffentlichungen

1. E. Schwarz, T. Seytter, B. Guiard und W. Neupert (1993). Targeting of cytochrome  $b_2$  into the intermembrane space: specific recognition of the sorting signal. *EMBO J.* **12**: 2295-2302.
2. N. Rowley, C. Prip-Buus, B. Westermann, C. Brown, E. Schwarz, B. Barrell und W. Neupert (1994). Mdj1p, a novel chaperone of the DnaJ family, is involved in mitochondrial biogenesis and protein folding. *Cell* **77**: 249-259.
3. E. Schwarz, B. Westermann, A. J. Caplan, G. Ludwig und W. Neupert (1994). *XDJI*, a gene encoding a novel non-essential DnaJ homologue from *Saccharomyces cerevisiae*. *Gene* **145**: 121-124.
4. E. Schwarz und W. Neupert (1994). Mitochondrial protein import: mechanisms, components and energetics. *Biochim. Biophys. Acta* **1187**: 270-274.
5. B. Westermann, C. Prip-Buus, W. Neupert und E. Schwarz (1995) The role of the GrpE homologue, Mge1p, in mediating protein import and protein folding in mitochondria. *EMBO J.* **14**: 3452-3460.
6. H. Ono, A. Gruhler, R. A. Stuart, B. Guiard, E. Schwarz und W. Neupert (1995). Sorting of cytochrome  $b_2$  to the intermembrane space of mitochondria: kinetic analysis of sorting intermediates demonstrates passage through the matrix. *J. Biol. Chem.* **270**: 16932-16938.
7. E. Schwarz (1997). *Saccharomyces cerevisiae* Mdj1p. In: Guidebook to Molecular Chaperones and Protein Folding Catalysts. (Hrsg: Mary-Jane Gething) A Saambrook & Tooze Publication, Oxford University Press, Oxford, UK S. 106-107.
8. C. Prip-Buus, B. Westermann, M. Schmitt, T. Langer, W. Neupert und E. Schwarz (1996). Role of the mitochondrial DnaJ homologue, Mdj1p, in the prevention of heat-induced protein aggregation. *FEBS Lett.* **380**: 142-146.
9. T. Langer, W. Neupert und E. Schwarz (1997). Functions of molecular chaperone proteins in the biogenesis of mitochondria. In: Guidebook to Molecular Chaperones and Protein Folding Catalysts. (Hrsg: Mary-Jane Gething) A Sambrook & Tooze Publication, Oxford University Press, Oxford, UK S. 499-506.

10. E. Schwarz, H. Lilie und R. Rudolph (1996). Effect of molecular chaperones on in vitro and in vivo folding processes. *Biol. Chem. Hoppe Seyler* **377**: 411-416.
11. B. Westermann, B. Gaume, J. M. Herrmann, W. Neupert und E. Schwarz (1996). The role of the mitochondrial DnaJ homolog, Mdj1p, as a chaperone for mitochondrially synthesized and imported proteins. *Mol. Cell. Biol.* **16**: 7063-7071.
12. A. Gruhler, I. Arnold, T Seytter, B. Guiard, E. Schwarz, W. Neupert und R. A. Stuart (1997). N-terminal hydrophobic sorting signals of preproteins confer mitochondrial hsp70 independence for import into mitochondria. *J. Biol. Chem.* **28**: 17410-17415.
13. T. Seytter, F. Lottspeich, W. Neupert und E. Schwarz (1998). Mam33p, an oligomeric, acidic protein in the mitochondrial matrix of *Saccharomyces cerevisiae* is related to the human complement receptor gC1q-R. *Yeast* **14**: 303-310.
14. M. Duchniewicz, A. Germaniuk, B. Westermann, W. Neupert, E. Schwarz und J. Marszalek (1999). Dual role of the mitochondrial chaperone Mdj1p in inheritance of mitochondrial DNA in yeast. *Mol. Cell. Biol.* **19**: 8201-8210.
15. T. Lisse und E. Schwarz (2000). Functional specificity of the mitochondrial DnaJ, Mdj1p, in *Saccharomyces cerevisiae*. *Mol. Gen. Genet.* **263**: 527-534.
